INNOVATIVE CORE SOLUTIONS

- 1LB polystyrene standard
- PUR glue system securely bonds core and skins for long-term durability
- Steel stiffened doors available
- Additional options: honeycomb, polyurethane, fiberboard, and high-density polystyrene

FRAME PROFILES & TYPES

- Double return (drywall)
- Single return (masonry)
- Double egress, kerf, and thermal break
- Flush face, cased open, hospital stops
- Adjustable and remodel frames

FRAME RABBET

- Unequal rabbet (standard); equal and single rabbet optional

WELDED FRAMES, STICK, ELEVATIONS

- 3-sided welded frames (face & continuous)
- Transom, side lites, and custom elevations
- Curved and arch top frames (HMX)
- Mullion, stick, cut-and-notch program

NVS: NON-VISIBLE SEAM

Mesker's NVS seamless edge doors have revolutionized the industry with a unique combination of strength, durability, and aesthetics - at the weight of a standard door. The NVS door outperformed traditional steel-stiffened doors in the Steel Door Institute (SDI) twist test, the industry measure of door strength and performance.

SOUND TRANSMISSION CLASS (STC)

STC openings reduce the amount of sound that is audible on the opposite side of the door. Specified in many medical and counseling offices, offices and conference rooms, multi-family and hotel rooms, industrial sites, and other installations where separation of airborne sound between adjacent spaces is needed.

TORNADO OPENINGS (FEMA)

Mesker's tornado rated assemblies are engineered to withstand requirements in the ICC-500 Standard for the Design and Construction of Residential or Community Storm Shelters.

HURRICANE ASSEMBLIES

Door and frame assemblies certified to Florida Building Code (FBC), Miami-Dade (NOA), and Texas Department of Insurance (TDI) standards.

BULLET RESISTENT ASSEMBLIES

Specially engineered to resist, at close range, Level 3 SPSA ammunition.

DURABLE FINISH

- Mesker anti-corrosion primer standard
- G90 galvanized products are unprimed

CERTIFICATIONS

- Up to 3-hr fire rating - FM, UL, Intertek
- Temperature rise

THERMAL RATINGS

- Polystyrene: U factor .41; R value of 2.33
- Polyurethane: U factor .39; R value of 2.48
